Investor Center: Technicals in View For Prestige Estates Projects Limited (PRESTIGE.NS)

Investors may be looking at some different technical levels in order to get a better grasp on the markets. Presently, the 14-day ADX for Prestige Estates Projects Limited (PRESTIGE.NS) is 22.05. In general, an ADX value from 0-25 would signal an absent or weak trend. A level of 25-50 would indicate a strong trend. A value of 50-75 would indicate a very strong trend, and a value of 75-100 would indicate an extremely strong trend. The Average Directional Index or ADX is a technical analysis indicator used to describe if a market is trending or not trending. The ADX alone measures trend strength but not direction. Using the ADX with the Plus Directional Indicator (DI) and Minus Directional Indicator (-DI) may help determine the direction of the trend as well as the overall momentum. Many traders will use the ADX alongside other indicators in order to help spot proper trading entry/exit points.

Prestige Estates Projects Limited (PRESTIGE.NS) presently has a 14-day Commodity Channel Index (CCI) of 32.87. Typically, the CCI oscillates above and below a zero line. Normal oscillations tend to stay in the range of -100 to 100. A CCI reading of 100 may represent overbought conditions, while readings near -100 may indicate oversold territory. Although the CCI indicator was developed for commodities, it has become a popular tool for equity evaluation as well. The Relative Strength Index (RSI) is a momentum oscillator that measures the speed and change of stock price movements. The RSI was developed by J. Welles Wilder, and it oscillates between 0 and 100. Generally, the RSI is considered to be oversold when it falls below 30 and overbought when it heads above 70. RSI can be used to detect general trends as well as finding divergences and failure swings. The 14-day RSI is currently at 53.74, the 7-day stands at 48.51, and the 3-day is sitting at 26.43.

Taking a peek at some Moving Averages, the 200-day is at 201.34, and the 50-day is 250.65. Dedicated investors may be looking to employ another tool for doing technical stock analysis. The Williams Percent Range or Williams %R is a technical indicator that was designed to measure overbought and oversold market conditions. The Williams %R indicator helps show the relative situation of the current price close to the period being observed. Prestige Estates Projects Limited (PRESTIGE.NS)'s Williams Percent Range or 14 day Williams %R presently is at -44.19. In general, if the reading goes above -20, the stock may be considered to be overbought. Alternately, if the indicator goes under -80, this may show the stock as being oversold.

Investors may be intent on creating unique strategies when approaching the equity markets. Individuals with longer-term mindsets may have completely different strategies than those who trade in the short-term. Whatever class they fall under, investors may have to decide how aggressive they want to be in order to capitalize on these strategies. Navigating the bull market may make things a bit easier for some and much harder for others. Many investors will set their sights on dips and corrections. This may prove to be a successful strategy, but this may also create many missed opportunities. Keeping track of key economic data along with market trends and earnings information typically seems to be a boon to any strategy. Highly active traders may keep close watch after the markets have a sleepy session or two. Investors staying the course might actually be relieved when activity cools a bit.
